

CRW Jordan's Principle System

The Jordan's Principle System aims at simplifying client registration, intake requests, case notes, approvals and accurate status reporting.

The system enables the user to easily create and update applications. Applications list parents or guardians as well as list all children under their care. Information on Case notes and Home Visits can be recorded and saved.

Intake requests can be made for each child and are listed for easy storing and reporting. Status updates on approved and received request are displayed for the user, as well as reports on individual or all children.

Purchase orders can be created and tracked. All transactions are recorded in the proper program areas. Cheque Requisitions can be done and Reports tracking status on Requests and POs are available.

The screenshots show the following sections of the CRW Jordan's Principle system:

- Applications:** Displays fields for Caregiver/Guardian Information (Find, First Name, Last Name, Treaty #), Spouse Information, and Dependent Children Information (Child's First Name, Last Name, Treaty Number, Child's DOB).
- Intake Requests:** Includes an Intake Request History table with columns for Created, Modified, Child, Request, On Reserve, Approved, Received, and Made By. It also shows a Dependent Children section and an Intake Request form with fields for Date, Caregiver Name, Phone #, Address, Child's Name, Treaty Number, DOB, and Request.
- Purchase Order's:** Shows a Purchase Order History and Purchase Order Details section with fields for Purchase Order #, Applicant, Date, Item, Qty, Item Price, Ext Price, Account, and Location. It also includes a section for Area, Item, Quantity, Item Price, Ext Price, and a Description field.
